Police Equipment News

CCW Breakaways Pant

► The CCW Breakaways Pant brings about a whole new methodology for concealed carry. This product is being sold primarily as a gun accessory and secondarily as a garment. The CCW Breakaways Pant allows the wearer to substantially improve his tactical proficiency because there is no holster and the gun is drawn with one hand (a second hand is not required to lift a shirt or vest). And the best part is that you're wearing normal-looking clothing—you don't look like a tactical operator. For more information, visit www.ccw-breakaways.com.

Helmet House Shoei Multitec LE Modular Helmet

► The Shoei Multitec Law Enforcement Modular Helmet is the latest in motor officer protection. Features include lightweight Advanced Integrated Matrix (AIM) Shell, removable cheek pads that are channeled to easily accept eyeglasses, an integrated breath guard, adjustable upper vents, and a sleek and aerodynamic shell design. The Multitec LE provides the officer with warmth, weather protection, and the lower wind-noise levels of a full-face helmet, but with the convenience of an open-face design. For more information, visit www.policehelmets.com.

Wigwam Tactical Line of Socks

► Wigwam, an authentic American brand of socks, is launching a Tactical line of socks, headwear and hand wear this August 2010. The Wigwam Tactical line of socks uses two patented technologies called the Pro Series and the Fusion Series. The Pro Series transports moisture and keeps feet dry from the bottom up. The Fusion Series is an outer sock and liner sock knit together as one which transfers moisture from the foot to the outer layer. Both technologies have a two-year guarantee. For more information, visit www.wigwam.com.

Safariland STRIKE Shield

► Safariland announced the addition of the STRIKE Shield to its PROTECH® Tactical line of specialty ballistic shields. Developed to address the growing need for ballistic protection during active shooter/first responder operations, the STRIKE Shield is designed with a unique flexible soft panel which allows it to be rolled up and stowed in a small carry bag for easy storage and portability, yet it is capable of quick deployment when needed. The STRIKE Shield's design makes it useful for operations where maneuverability is limited and the use of a hard armor shield is impractical. For more information, visit www.safariland.com.
