

CCW Breakaways New Product Release April 2012

CCW Breakaways recently released their Jeans – a follow up product line to their existing Khakis and Cargos. The unique CCW Breakaways process and products are game-changers in the arm's length gun-fight. Unique built-in, disguised holster-pockets have enlargeable “breakaway” openings which enable:

- a Faster-Than-Holster Draw (0.66 seconds one-handed deployment)
- the Deepest Concealment (below the hip line-of-flexure)
- the Most Comfortable Carry system (no pinching or binding)

Jeans are a traditional relaxed-fit wear, designed to carry and conceal compact semi-automatics, J-Frames and similar revolvers. Khakis & Cargos have a classic comfort-fit and are constructed to carry and conceal nearly all firearm sizes.

For specific details about the method and the products, please visit: www.ccwbreakaways.com
